

Concrete Stairs

CONCRETE BUILT IS BETTER BUILT

Concrete Stairs are the ideal way to provide access to basements, upper floors and lofts. The Precast units provide safe solid access during construction and a secure base for attractive finishes in the completed construction

Tailored - Wright Quarry Products design team provide stair solutions specific to each plan in compliance with relevant building regulations

Simple - Precast stairs will usually be placed by a truck mounted crane along with the precast flooring installation

Safe - Concrete stairs provide a much safer means of accessing other floors during construction than ladders or other temporary systems

Attractive - Using concrete as a resilient, solid, durable base, attractive finishes can be added in the form of timber, stone, tiles or another finish of choice

Concrete Panels

CONCRETE BUILT IS BETTER BUILT

Concrete Panels are the fast efficient way to erect robust walls in residential zones, livestock facilities and where falling of filled ground needs to be retained

Robust Walls - Reinforced concrete provides the ideal system for construction of resilient structures

Range of Finishes - Panels can be provided with cost effective smooth or exposed aggregate finishes

Simple placement - Panels can be delivered and fitted or supplied to site for placement with regular construction machinery

Fast Construction - Large areas can be enclosed in very short periods of time assisting construction programming
